

ADVANCED ENDOSCOPY DEVICES, INC.

Complete Endoscopy For All Specialties

SALES – REPAIR – SERVICE

Since 1985, National Advanced Endoscopy Devices, Inc. is a leader in sales, repair and servicing of Endoscopes, Endoscopic Instruments, General Instrumentation and ancillary items. Because of AED's superior capability in the repair of endoscopic equipment, we are the repair source for various large representative repair organizations. **You probably are already using us and do not know it.** AED is now going direct and offering superior quality and capability at a considerable cost savings.

AED repairs all manufacturers' endoscopic instruments. Our European factory trained master technicians have a combined work experience of over 300 years in endoscopic manufacturing and repair, thus striving to ensure the customers complete satisfaction. AED only utilizes new original specification parts and adheres to strict GMP standards. We maintain an extensive inventory of parts in order to offer our customers the shortest turnaround time possible, 24 hours in most cases. AED is registered with the FDA and utilizes only FDA approved and USP Class 6 materials to ensure the proper repair.

AED also offers a complete line of new endoscopes and instruments for all specialties in Endoscopy. AED endoscopes are **unique** in that they are adaptable to all major manufacturers' systems including Storz, Olympus, Wolf, ACMI, Stryker and Comeg. AED endoscopes and instruments are of equal or superior quality to all major manufacturers **at half the price.** No other company offers this type of adaptable system in the United States.

Producing one of the brightest, flattest, sharpest, edge to edge images in the industry AED endoscopes use only German optics and surgical grade materials. The complete line of AED endoscopes and instruments are of exceptional quality, Steam Autoclavable with outstanding warranties.

The Speedlock[®] Laparoscopic Instruments system surpasses any other product line in the endoscopic market today in terms of quality and handling. Some highlights include a cleaning port, which allows easy and time saving reprocessing, without taking the instruments apart. Jaws made out of special stainless steel, making them even harder and better resistant against torque, tension and corrosion. The innovative new and unique bayonet coupling makes assembly secure and so much easier.

Only an ongoing dialogue with users in combination with our multiple years of experience and continuous development has made AED the exceptional source for all your Endoscopy needs.
