

IMAGE ACCESS CORP

Your Document Imaging Professionals

ABOUT DOCUMENT MANAGEMENT: Getting prepared for EMR / EHR

For healthcare providers, administrative and accounting staff, the ability to immediately access every piece of information or history relating to an individual or a specific inquiry is an enormous time saver. Now with instant access you can give anyone with the permission rights to view the file and provide accurate answers. But that is just the start. **With digital content comes the opportunity to re-engineer workflow in your healthcare operations to reduce cycle times, increase productivity, and improve patient care saving even more money with Electronic Medical and Health Records solutions.**

ABOUT DOCUMENT SCANNERS: Over 40 scanners to choose from

One of the advantages of the scanner technology is that it is totally scalable with personal scanners priced at less than \$500, workgroup scanners starting at \$1,200, departmental and low volume scanners ranging from \$2,300 to \$5,500 and high volume production scanners ranging from \$15,000 to \$85,000. In total there are over forty different scanners for JPC members to choose from. **This will give you the greatest range of functionality and performance to meet the needs of single physician practices on up to large hospitals.**

ABOUT CAPTURE SOFTWARE: Document and Data Capture

A full line of document recognition, document conversion and data capture technologies designed to optimize the delivery of mission-critical information into a healthcare organization. This will transform paper, electronic forms and documents into accurate, valuable data that can be stored and quickly accessed. You can choose the right document and capture product for your organization, no matter your size, or the number of paper and electronic documents you process each day. These solutions not only deliver critical data needed provide healthcare and run your business, but can **also have a significant impact on your bottom line, potentially realizing a complete return on your investment within months of deployment.**

ABOUT CONTENT MANAGEMENT SOFTWARE: ECM

At the heart of your document management solution is Enterprise Content Manager Software, which digitizes and organizes your enterprise information, allowing you to span departmental information silos and redistribute content to the appropriate individuals right from your desktop or browser. Knowledge workers and professionals today are comfortable working with structured data stored in databases. But many do not realize that they can also have easy access to their unstructured data. This represents 80% of company data known as content, which includes documents, letters, correspondence, reports, e-mail, faxes, PC files and rich media like audio and video. Instead of keeping all this information on paper, microfilm and PCs spread across your enterprise, **a content management system manages it electronically so you can access it from anywhere, right on your desktop and eventually at the patients bedside.**

ABOUT SUPPLIES & CONSUMABLES: Everything you need!

There are literally hundreds of Supplies and Consumables associated with the Document Scanners that we are recommending. For optimal feeder performance and image quality, we recommend using professional cleaning materials and consumable items, such as: roller cleaning pads, transport cleaning sheets, staticide wipes, calibration targets, feeder and separation rollers, lamps, ink cartridges and imaging guides. A complete list of supplies and consumables is listed on the website.
