

August, 2008

Dear JPC Members:

Please be advised that TRIMLINE Medical will no longer manufacture mercurial sphygmomanometers effective immediately. Although the TRIMLINE Mercurial brand has been manufactured since 1969, over the past several years the sales of mercury instruments have progressively declined. We apologize for the short nature of this product change; however, it has become impossible for us to obtain many of the components needed to manufacture the units in such small quantities. A list of the part numbers that are being discontinued is below.

The TRIMLINE Medical product line will continue to include Large Face Aneroid Sphygmomanometers and portable aneroid gauges, as well as a comprehensive line of reusable and disposable blood pressure cuffing systems and diagnostic stethoscopes. For full product information, feel free to visit our web site at www.trimline.us. Our Large Face Aneroid models are available for your customers seeking mercury replacement.

Again, we are sorry for the inconvenience this may cause. We thank you for your support in the past and look forward to servicing you in the future.

Sincerely,
Richard F. Jacobson
President
