

## **INTELERAD PROMOTIONAL SUMMARY**

- Intelrad is pleased to offer its **IntelePACS®** solutions to JPC member organizations and participating facilities.
- **IntelePACS®** is highly acclaimed by our clients for customer satisfaction and is consistently ranked at the top of KLAS reports.
- Intelrad offers **IntelePACS®** at preferred pricing and financing unique to JPC members.

### **Enterprise-level solution**

**IntelePACS®** is a scalable enterprise-level solution, suitable for single clinics as well as large multi-facility organizations. Our people are talented at addressing complex architecture and workflow challenges and helping you achieve your goals.

### **High performance and flexible architecture**

**IntelePACS®** employs compression technologies, load balancing and other system design strategies in unique ways. This approach avoids single points of failure in your PACS while providing optimal performance and high availability.

### **Ease of use**

We place a lot of emphasis on the customer perspective when developing our software. The result is intuitive software, designed to reduce administrative and training requirements. Even the most demanding users will be satisfied with how quickly they are up and running.

## **WHAT MAKES US DIFFERENT?**

Intelrad has a different view of support: we believe it is our responsibility to know if there is an issue with your PACS, not yours. We do not wait for your distress call. If action is needed, we initiate it, whether it is midday or midnight. Of course, we will happily accept your calls, but we want to know about the issue before you do, to provide you with a faster and better response.

## **SUPPORT PHILOSOPHY**

Whether you operate a single clinic or a multi-site institution, you need to know that your PACS will store and deliver images around the clock. This peace of mind can only come from a company that truly understands what it is like to work in a mission-critical healthcare environment.

### **SHARED RISK FINANCING**

We understand the current economic reality and are offering payment terms to help through this difficult time. Finance the software and installation costs over a four year period with no interest. To reinforce our commitment, we also provide the flexibility to terminate the contract early under favorable terms.

Picture the difference people make
